Structure all in Inox AISI 304	

Completely assembled in Italy using components of EU origin only.

RP is a marker engraved for paper labels to be used on packaging to intermittent motion.

The stamper is equipped with anti-rotation cylinder compact two flow controls allow you to adjust labor intensity of the cylinder itself.

The supporting characters is easily removable.

The main support is designed to allow to mount the stamper so as to mark each 90 °.

The marking pressure does not require consumables such as cartridges or ink and this is a very economical marking.
