

Ink stamper RT120

Technical features:

Printing area:	15x30 mm
Type holder groove:	4 grooves for ribbon characters
Speed: strokes/min:	up to 120
Number of heads:	1
Operating pressure:	4-6 bar
Structure all in Inox AISI 304	

Completely assembled in Italy using components of EU origin only.

Ideal machine for marking quality, very compact designed to be robust and reliable.

RT 120 is a suitable marker for still products such as labels in intermittent motion packaging or packaging of any kind.

The stamper is equipped with a cylinder with a slide adjustment in the approach to the end product to be marked two flow controls allow you to adjust the working pressure of the base port characters.

The characters in rubber are easily managed as a simple pressure mounted.

The main support is designed to allow to mount the stamper so as to be marked in any position and angle.

The marking can be done with inks rapid or slow to meet every need.

Low operating costs.
